

AMERICAN RADIOLOGY TECHNOLOGIES

Date:

To Whom It May Concern:

I have known Mr. Bill Leon and Mr. Dan Lobo in a professional sense for the last 4 years. Their professional record and numerous publications speak for themselves.

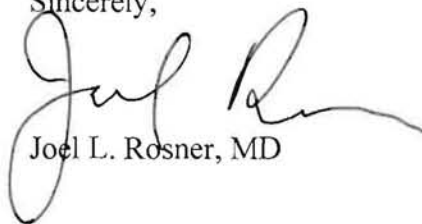

I want to address their expertise in educating technologists.

I am trained as a Musculoskeletal Radiologist and read MRI studies of the joints for over 30 MRI centers across the country. The MRI -CT centers Bill and Dan are associated with provide excellent image quality, which allow me to accurately and concisely interpret the images. I have personally witnessed their training and have the utmost professional respect for their tremendous technical expertise.

The MRI-CT Group has trained many technologists working at centers our radiology group interprets and these individuals produce some of the best quality work we read.

I highly and without qualification recommend Bill and Dan's MRI-CT Program.

Sincerely,

Joel L. Rosner, MD
