Re: Recognition of excellence

Dear Danny,

It is a pleasure to write a letter of reference and appreciation for the very important service you and Bill have provided the world of MR imaging in Florida with your MR Educational Group programs. Since your beginning 10 years ago, you and Bill have both directly and indirectly helped elevate the standard of diagnostic care in south Florida by sharing your extensive knowledge with countless technologists and doctors teaching them how to obtain better diagnostics with more information from MR imagery. You have also helped the medical community understand the value in high-field MR technology and contributed to the predominant presence of high field MR systems in south Florida.

As the exclusive distributor for a major MR manufacturer in Florida, i.e. GE Healthcare, we are grateful for your role in having provided south Florida with many qualified technologists to assist with the operation of state-of-the-art platforms which has directly influenced the success of many of these MR facilities and therefore many of our customers. By facilitating the optimization of MR technology among diagnostic facilities, the medical community is better served, centers generate more referrals, produce more scans, and ultimately the patient is the real benefactor.

It is our hope that you continue your efforts and truly appreciate your contribution to the world of MR imaging.

Sincerely,

Michael Alvarez
Vice President
