RE: MRI Education Group Inc.

To whom it may concern:

Med-Lab has been associated with MRI Education Group since the beginning of MRI Education Group. We have known the principals, Daniel Lobo and Bill Leon, for over 25 years from the early days of MRI. These individuals are ethical, hard working and dedicated to their students and patients.

MRI Education Group has been educating technologists to operate the MR equipment for over twenty years and the 700 or more students that graduate from their group perform superbly in the field. The combination of clinical and theoretical teachings by MRI Education Group prepares the students extremely well.

By starting in MR in the early days and working on the development of protocols and sequences for the last 25 years in all types of magnets, Daniel and Bill know MR like few individuals know MR and can operate, teach and evaluate MR systems. Daniel and Bill also know and understand the business of aspects of healthcare delivery and have been successful in the implementation of outpatient centers.

Med-Lab highly recommends MRI Education Group Inc. and its principals as consultants and educators.

Sincerely,
SIEMENS/MED-LAB

Gonzalo A. Diaz
